

DFMZ
DESIGN FILTRATION MICROZONE

A LEADER IN BUILDING CLEANER ENVIRONMENTS

2.5 Softwall

A low cost alternative, the DFMZ 2.5 Softwall features the design, performance and reliability you would expect from a high-end cleanroom with economical pricing. Our unique assembly process allows you, the end user, to install your own Softwall Cleanroom quickly and efficiently, potentially saving thousands in installation costs.

Key Features

- **Easy Installation**
The DFMZ 2.5 Softwall comes pre-tagged to allow for quick and easy installation in a matter of hours.
- **Durable Structure**
The DFMZ 2.5 Softwall features an interlocking, powder-coated, steel frame structure.
- **Design Flexibility**
DFMZ 2.5 cleanrooms are built to suit your specific size and classification requirements.
- **Reduced Energy Costs**
Our energy-efficient HEPA units and light fixtures help reduce energy costs associated with other cleanrooms.
- **Growth**
As your growth in the future increases so does DFMZ 2.5. Our design allows you to easily expand and upgrade.

Standard Features

- ISO CLASS 4 to CLASS 8 (formerly CLASS 10 to 100,000)
