DESIGN FILTRATION MICROZONE

A LEADER IN BUILDING CLEANER ENVIRONMENTS

CAW - Reverse Flow

Design Filtration developed the "CAW" (Clean Air Workstation) to allow any bench top to be converted into a Containment Hood. Our unique assembly process provides for quick lead times and keeps your budget in mind. Our roster of "CAW" benches features the highest quality material, workmanship and exclusive features found on the market today

Key Features

- **Reduced energy costs**
Helping you reduce energy costs our "CAW" series of clean benches uses a maximum 1.74-amp (4-foot model)
- **Value**
For the cost conscious our "CAW" series are less expensive than most other similar products
- **Portable**
Easily moved to another location
- **Easy Installation**
The slim profile allows for quick, easy installation through most standard doorways
- **Optional Accessories**
We can manufacture your hood with selected options to suit your specific requirements

Standard Features

- High Efficiency Particulate Air (HEPA) filter rated 99.99% efficient at 0.3 microns
- Particle free product protection – minimum ISO CLASS 5 conditions
- Large side windows allows for an abundance of natural light
- Energy efficient fluorescent lighting
- Quick change disposable pre-filters – no tools required
- 2 Year Limited Warranty

Optional Features

- Knock down base frame
- Vertical rising or hinged face shields
- Work zone duplex outlets
- Minihelic gauge to monitor load on filter
- ULPA filter for ISO 4 conditions
- Service valves
- Assorted interior finishes
