

**DFMZ**  
DESIGN FILTRATION MICROZONE

## A LEADER IN BUILDING CLEANER ENVIRONMENTS

### Casework

Design Filtration Microzone has developed a line of casework ideal for laboratories carrying out trace metal detection processes and working with corrosive materials. Choose from our wide variety of base cabinet configurations and matching wall cabinets to design your perfect laboratory.

[Click for Brochure](#)

#### Key Features

- **Corrosion Resistant**  
Constructed from corrosion-resistant white polypropylene, this casework is ideal for laboratories using corrosive chemicals and is resilient to frequent sanitizing.
- **'Metal-Free' Construction**  
Our line of casework meets the requirements for metal-free construction, where the body and hardware are made of plastics, and any small metal mechanisms are encased in plastic.

#### Standard Features

- Seam-welded polypropylene body
- Thick polypropylene counter tops, standard 30" or narrow 24" depth
- 36" standard height
- Adjustable shelves
- Black polypropylene & PVC hardware
- Adjustable leg levelers
- Back access panel to rear chase area
- 1 Year Warranty (Parts & Labour)

#### Optional Features

- Single sinks, polypropylene
- Double sinks, polypropylene
- Cup sinks, black resin
- Gooseneck faucets with single or double handles, polypropylene
- DI spray gun, nylon
- Custom cabinets
