

DFMZ
DESIGN FILTRATION MICROZONE

**A LEADER IN BUILDING
CLEANER ENVIRONMENTS**

Cyanoacrylate Fuming Chamber

The Cyanoacrylate Fuming Chamber provides safe working conditions for the operator while protecting the surrounding environment by filtering out noxious chemical odors. Our Fuming Chamber includes desirable standard features such as an internal fan for accelerating the process, humidity controls and timers. It's just an example of how our Cyanoacrylate Fuming Chamber delivers quality construction and engineering you'd expect from a unit costing thousands more.

Key Features

- **Safety**
Exhaust fan timer to safely remove harmful cyanoacrylate prior to entering the chamber.
- **Reduced Energy Costs**
The SafeDry uses less than 3-amps power consumption to help reduce your everyday energy costs.

Standard Features

- Easy-to-change carbon filtration to remove potentially harmful chemicals
- Internal fan for accelerating cyanoacrylate
- Stainless steel hanging rod
- Locking door hardware to prevent accidental entry
- Perforated work deck allows for efficient airflow
- Internal fluorescent light fixture
- Control panel monitors humidity levels within the chamber
- 2 Year Full Warranty (Parts & Labour)

Optional Features

- Collar connection for external ducting
