

DFMZ
DESIGN FILTRATION MICROZONE

A LEADER IN BUILDING CLEANER ENVIRONMENTS

Drying Cabinet

The SafeDry Forensic Drying Cabinet provides safe working conditions for the operator while protecting the surrounding environment by filtering out noxious chemical odors and harmful particulate matter. The SafeDry includes desirable standard features such as wash down systems, airflow monitors and removable corrosion-resistant storage shelves. It's just an example of how SafeDry delivers quality construction and engineering you'd expect from a unit costing thousands more.

Key Features

- **Space**
The SafeDry provides a clean, secure environment for storing and drying forensic evidence.
- **Interior**
SafeDry provides more than enough interior space. With over 10 square feet of storage capacity you'll never run out of room.
- **Construction**
Seam-welded, corrosion-resistant polypropylene complete with large, clear acrylic viewing doors.
- **Filtration**
Protect your forensic evidence from harmful pathogens and cross contamination while eliminating harmful fumes and odors to protect personnel.
- **Reduced Energy Costs**
The SafeDry uses a maximum of 1.92-amps (3-foot) energy consumption to help reduce your everyday energy costs.

Standard Features

- High efficiency particulate air (HEPA) filter rated 99.99% efficient at 0.3 microns
- Easy-to-change carbon filtration to remove potentially harmful chemicals
- Wash down system
- Removable storage shelves
- Airflow alarm package
- Locking door hardware to prevent evidence tampering
- Sloped bottom to allow proper drainage
- 2 Year Full Warranty (Parts & Labour)

Optional Features

- Front intake HEPA filter to provide HEPA in / HEPA out protection
- Custom engineered sizes
- Pump connection removes waste to a catch basin or sink
