Emergency Back Up Kit

Our SL-60 Emergency LED Driver provides an easy solution for emergency lighting when used with our LED flat panel light fixtures. When ordered with the LED flat panel light, it will be pre-wired so no extra installation work will be required.

Key Features

- Sealed, no-maintenance Nickel-Cadmium battery that you just replace at the end of service
- Provides up to 8.4W of power at 60VAC to give up to 2 hours in reduced light mode when used with a 2' x 4' standard 60W light (longer with smaller lights)
- Comes complete with test button and electrical box for location in ceilings or walls
- Not recommended for damp locations
- Suitable for voltage inputs of 120VAC to 277VAC
- Requires an un-switched power source
- Can be used on LED light drivers with output current up 3.0A
