

DFMZ
DESIGN FILTRATION MICROZONE

A LEADER IN BUILDING CLEANER ENVIRONMENTS

PharmaMod 797

DFMZ PharmaMod 797 Cleanroom System is extremely popular with compounding pharmacists who require a solid facility at a great price. Walls are constructed with our DFMZ 1.5 wall system and equipped with the DFMZ 2.0 covered ceiling. The PharmaMod 797 system has been installed across the USA and Canada (from Florida to California and from Vancouver Island to the Maritime Provinces). The key to our success is carefully working with each pharmacist to develop a custom design that fits their particular space and process flow.

Key Features

- Heavy-duty, anodized, extruded aluminum frame (1-5/8" or 2" thick)
- Solid white polypropylene and clear acrylic inserts
- Ceiling height of 8'; however, virtually any height up to 16' can be provided
- Sliding or swing doors constructed with extruded aluminum frames and clear acrylic inserts
- Anodized, aluminum service chases with snap covers allow for easy installation and future modification of services
- DFMZ 2.0 Ceiling Grid with covered transitions
- [Design-Aire HEPA Filter Fan Modules](#)
- Gauge Panels complete with room pressure monitoring and light switches
